

A POWERFUL LINEUP OF WORKPLACE MOBILITY SYSTEMS

THE POWER TO MOVE YOUR WORKPLACE

Converting a stationary workplace to a mobile one is the easiest, most economical way to increase productivity of your current workers and infrastructure. Our Mobile Workplace and Portable Power Systems let you take your workstations wherever they are needed.

Benefits include:

Generating Productivity

Our Mobile Workplace System means you can achieve the same amount of volume with fewer pieces of equipment (i.e. printers, computers, etc.) by converting to mobile workstations.

Instant Gratification

Quickly obtain measurable productivity gains without months of planning and implementation. Workstations are delivered and can be on the floor the same day.

Improving Processes

The Portable Power System allows you to fully leverage your wireless facility by cutting the power cords and letting your workstations move to where they are needed - with your people.

Enabling People

Operators & managers now have access to data and real-time information anywhere in the facility because they can take their workstation with them.

**“We are receiving the same amount of product – but with less overtime.
Receiving has gone through the roof since there is no down time.”**

Troy Horn, Tyco International

COMPACT RC SERIES

The RC Series is our most economical, compact workstation. Its small profile enables easy movement within any facility.

- Powers laptop, printer & scanner for up to 8+ hours
- Highly versatile with an array of modular accessories

MID-RANGE NB SERIES

The patented NB Series Mobile Powered Workstation was developed to provide true mobility ANYWHERE in a facility.

- Rechargeable power with the ability to run up to 4 devices at once for 8-12+ hours of normal use
- Using a slotted upright system, the shelves & accessories can be quickly adjusted in seconds to suit the operator's needs
- Compatible with the new Power Swap System (back page)

POWER SWAP SYSTEM

The NEW Power Swap System enables the NB Series Mobile Workstation to power your printers, computers, scales, testers and other hardware 24 HOURS PER DAY. It's ideal for facilities with multiple work shifts.

- Designed to keep the NB Series Workstation powered 24 hours a day
- When the power starts to run low, simply swap out the power package with a fully charged one
- Swap takes only 30 seconds to complete

POWER PACK SERIES

The Power Pack Series Portable Power System provides quiet, seamless AC power for as long as 12+ hours at a time. This sturdy, compact unit is ideal for powering computers, printers, POS systems, scales, testers and any other electronic hardware. At the end of your shift or use, simply plug the unit into a standard wall outlet to recharge.

- Quiet, seamless AC power where and when you need it
- Eliminate the need for noisy generators or extension cords
