

GO LEAN. GO LEARN.

THE GOAL OF THIS EVENT IS TO HELP OPTIMIZE YOUR OPERATIONAL EFFICIENCY IN THE WAREHOUSE BY IMPLEMENTING “LEAN THINKING”

What You Will Learn:

This event describes; (1) what you can do, within your distribution center/warehouse operations, that addresses the elimination of waste and; (2) within the context of the major warehouse functions you perform, how lean thinking methods and technologies can increase productivity now...and provide opportunity for future cost avoidance.

Key Take Aways

- Understand the differences between the way a lean organization thinks and acts
- Identify the 8 most common causes of non-productive time
- Learn LEAN best practices with process standardization, 5S, and Visual Workplace techniques that will make problems visible and improve team membership engagement
- Get an intro to “takt time” and Kaizen
- Learn how to perform a Gemba Walk to effectively identify waste in your warehouse
- Some “Great Places to Start” – We’ll perform a Receiving Process Kaizen together

Agenda Overview Wednesday, June 21, 2017
